This architectural site plan illustrates the layout of a residential complex within a larger urban context. The plan features several buildings, including a prominent two-story structure on the left and a cluster of smaller units on the right. A network of roads, depicted in blue with hatching, connects the buildings and provides access to the site. Utility infrastructure, such as pipes and ducts, is shown in various colors (blue, pink, red) throughout the plan. A red dashed line marks the 'SITE BOUNDARY'. The vertical axis on the left is labeled with numbers 02 through 09, and the horizontal axis at the bottom is labeled with letters A through K. A note on the right side reads 'REFER TO SHEET CC-SDWG-MEC-02-2201 FOR CONTINUATION'.
